Dear Charlie,

We just completed our review and inspection of the new football field you installed for us. Our first season was a huge success and everywhere I went the field was the lead conversation piece. We are so happy with the field and the way it performs, and our athletes absolutely love it. Coach Viator and the staff utilize it almost every day, regardless of the weather conditions. It has freed up the time we typically used in the past for preparation and event organization and made the whole facilities staff more efficient.

I don't think any member of the staff quite understood just how superior this technology was until we had the opportunity to visit other Southland Conference opponents' turf fields. No other field in the conference even comes close to the field at Cowboy Stadium and the vast majority of the visiting coaches echoed this sentiment. Every other field was overfilled with rubber or sand and our athletes complained about traction and also the infill getting in equipment, mouthpieces and of course in their eyes. We never had any infill movement or visible infill on our field and the difference this makes is priceless in the performance and maintenance of the surface.

Another huge discrepancy we noticed was the fact that the Cowboy Stadium field was noticeably cooler than any other field we played on. Even during our daily practices or during our day games, surface temperature was never a factor. But when we played on some of the other turf fields in the conference the heat factor was overwhelming. You could actually see the heat vapors above the surface. We could never see this on our field even on the hottest days.

Everything has been even better than we expected and the service you have provided for us exceeds all expectations. We truly appreciate the job you and your crew did to get this facility ready to go. If we can ever do anything for you or if you ever need to present Cowboy Stadium to a prospective client, feel free to give me a call. I assure you, anyone that visits this field will see first hand that the best athletic surface in Louisiana is at McNeese State University.

Sincerely,

Scott Pendarvis
Assistant Athletic Director
