

GEO TRAX® FT

FILAMENT TRACK

GeoTrax® FT is the first synthetic filament running track surface engineered to allow “tuning” of the surface response-time in order to customize surface performance for its primary use.

SUPERIOR FUNCTIONALITY

The GeoTrax FT running track technology allows for superior functionality and increased usable space for sports other than track.

By eliminating dangerous transitions and hard asphalt or concrete surfaces, the GeoTrax FT design takes what was once a surface with little to no value for multi-sport use and converts it to a usable surface for every sport.

“TUNNING” THE SURFACE

GeoTrax FT running track is not designed to be a replacement for an IAAF surface but does offer great value for entry level track users and facilities that wish to maximize the functionality of the sports surfacing.

No surface is ideal for all types of use. Sprinters perform better on a fast-response (harder) surface. Longer event runners maximize performance with a slower-response (softer) surface. Practice and training require a surface with higher shock attenuation to reduce wear and fatigue on athlete’s joints and muscles.

The user should determine the best configuration for his intended primary use and be able to “tune” the track surface accordingly.

COLORS & PERMANENT MARKINGS

The GeoTrax FT technology allows the client to select school colors at no additional cost as well as install permanent lane lines and event markings. These advances eliminate costly re-stripping and give the client a freshly painted look for years to come.

MAINTENANCE

The GeoTrax FT technology will cost considerably less than the norm for a conventional track surface. All conventional track surfaces require re-surfacing in 5 to 7 years. Re-surfacing (8-lane track) cost can range from \$60,000 to \$180,000. By comparison, the GeoTrax FT running track should not need maintenance for 5-6 years; and even partial replacement in high wear areas is much less costly. In addition, if permanent markings are selected, virtually zero maintenance cost should occur in the first 5 years. The GeoTrax FT running track includes a 5-year warranty.

GEO
SURFACES

“TURN-KEY” SPORTS SURFACING

GeoSurfaces is one of the few companies in the USA that offers in-house “turn key” sports lighting and sports surfacing. We are a licensed Professional Construction Firm, Electrical Firm, and Construction Manager that can offer complete construction and installation of FIFA, IAAF and ITF Approved Surfaces.
